

Arca CC3R Coin Recycler

Automatic Coin Dispensing and Depositing

Description

The CC3R provides automatic coin float dispensing and depositing as well as tracking of all transactions carried out by staff.

The CC3R is a highly efficient coin management solution with a compact footprint. It frees businesses from coin handling constraints and costs, maximizing staff availability for customer facing activities. As a result, the CC3R generates significant costs savings from the first month in situ.

This solution can be connected to Quireo cash management software for both reporting and the centralised management of cash flow.

Automatic Dispensing

The CC3R automatically distributes a coin float at the beginning of a shift and dispenses coin for cashiers who need change during the day.

Secure Depositing

At the end of a shift, after identification, cashiers can easily deposit their coin takings into the machine. Coin is immediately processed and the amount of the deposit is directly recorded.

Coin Recycling

After each deposit the coin is recycled and ready to be redistributed to the cash floats.

Specifications

Coin Deposit:

- Certified by the European Central Bank
- Coin deposit in bulk
- 8 Euro denominations

Technical Information:

- 8 recycling coin hoppers
- 15" colour touchscreen
